064300

Metal parts: tombac, gold plating/ brass
(HAA-CP-002E is made by resin)

HARIO Lampwork Factory

We have been making glass for over 90 years (since 1921).

At the very beginning, each laboratory glassware and food container were made by hand.

Later on, most of the production has been shifted to machinery and now it is getting rare to see a man in our plant.

We are now going back to our origin, to present the world our hand made glass accessories, and

for inheritance of craftsmen skill to the next generation. This is the spirit of our brand.

We are continuing to bring new life to one of the cleanest materials -- heatproof glass in the future.
