

# HARIO V60

## COFFEE DRIPPER

世界で認められている V60 コーヒードリッパー。

円すい形のわけ

V型円すい形のペーパーフィルターは、コーヒー粉の層が深く、コーヒー粉に注いだお湯が円すいの頂点に向かって流れるので豆の旨味をしっかりと抽出できます。

The design makes it easy to see the amount of GLASS coffee even in opaque thermal mugs and servers.

## GLASS

For hot drink

V60 Glass Dripper 01  
**VDGR-01-B**

When brewing with a coffee scale.

360 size uses 3 fingers, 600 size uses 4 fingers. It has a large handle that allows for a firm grip.

A sharp spout.

## V60 Barista Server

**A new standard coffee server born from the voices of baristas.**

This simple server was born from the voice of Barista to make it easy to hold, mix, and pour.

To enjoy the liquid color, we have eliminated the markings and markings from the sides.

This server combines the cuteness and dignified beauty of the coffee accumulated in the server that looks delicious.

With a diameter of 80mm, it is compatible with various extraction equipment and is easy to clean after extraction.

For microwave

Do not expose  
to open flames

Material: Glass dripper, Glass server, Glass Lid / Heatproof glass  
Arm stand / Stainless steel, Zinc alloy, Phenol resin  
Holder ring, Drip tray, The sealant attached to the glass lid  
/ Silicone rubber  
Measuring spoon / Polypropylene

## Authentic coffee made stylishly.

The dripper is based on the V60 cone shape.  
You can enjoy the ease of paper filter drip and the  
flavors of a cloth filter drip.  
The silicone band can be removed and washed.  
The dripper is designed to stand by itself.

## V60Coffee paper filter FSC® Certified eco-friendly paper filter.

責任ある森林管理  
のマーク

HARIO acquired FSC® certification in December 2020.  
By using FSC® certified products, consumers can contribute to global environmental conservation. HARIO will continue to manufacture products that are environmentally friendly.

FSC® (Forest Stewardship Council®, 森林管理協議会) は、責任ある森林管理を世界に普及させることを目的に設立された国際的な非営利団体です。責任ある森林管理から生産される木材とその製品を識別し、それを消費者に届けることで、責任ある森林管理を消費者が支える仕組みを作っています。  
FSC® 認証は、多くの消費者、環境団体、企業などから支持を集め、世界で最も信頼度の高い森林認証制度として国際的に知られています。

## COFFEE DRIP KETTLE

Drip kettles used by baristas around the world.

The V60 series drip kettle is used in cafes all over the world.  
Enjoy your drip with the iconic V60 shaped kettle.

### Easy to pour, coffee drip kettle with a slim spout

This drip kettle with a slim spout makes it easier to control the amount and speed of hot water being poured, making it useful when brewing a V60. 500ml compact size has been added to the Buono series.

## V60 DRIP KETTLE BUONO

For open flames

Material: Body of the kettle, Lid / Copper  
Lid Knob / Natural wood  
Handle / Brass  
Handle cover / Silicone rubber

## Master Brand Coffee Items

A beautiful traditional Arita ware dripper.

It is easy to see the amount of coffee even in opaque mugs.

You can hang it in a frequently used place.

## A dripper that can brew coffee in a single pour.

This dripper lacks internal ribbing, so paper filters stick to it as coffee flows down the star-shaped grooves to slowly brew. You can also remove the holder to place just the dripper on a stand to brew.

VDMU-02-TB (Transparent Black)

V60 One Pour Dripper MUGEN  
**VDMU-02-TB**

C/T48 031302  
W142 x D116 x H94mm  $\Phi$ 116mm  
1 ~ 2 cups

Material: Body/Acrylonitrile-styrene resin  
Holder/Polypropylene

V60 One Pour Dripper MUGEN(Ceramic)  
**VDMU-02-CW**

C/T24 031326  
W143 x D117 x H95mm  $\Phi$ 117mm  
1 ~ 2 cups

Material: Body/Ceramic  
Holder/Polypropylene

Put ground coffee into the paper and pour in hot water.

After immersing coffee for a while, press the switch to start dripping.

## Immersion Dropper SWITCH

This dropper extracts coffee after immersing ground coffee in hot water. It starts dripping after the switch is pressed, allowing anyone to extract coffee evenly.

Coffee is dripped to the end even if you release your finger.

For hot drink

Material: Glass bowl / Heatproof glass  
Base / Silicone rubber  
Switch / PCT resin  
Stainless steel ball / Stainless steel

## A dripper made entirely of stainless steel with a double mesh filter

In the dripper, two finely etched mesh filters overlap. Appreciate the translucent liquid as if prepared with a paper filter, along with a rich flavor and a touch of the coffee's natural oils unique only to this metal filter.

Scale marks are shown for coffee grounds as a guide.

The precision double mesh filter does not allow the finer coffee powder to pass through.

Coffee oil is extracted.

World Champion Collaboration

Drops hot water like a shower to stabilize V60 extraction.

Two types of hole help brew quality coffee.

Water flows into the central section when the outer ring is full.

## Drip-Assist

### Barista-quality V60 coffee for everyone

This helpful tool is designed to simplify the coffee brewing process. Enjoy brewing coffee with the V60 Drip-Assist.

Two holes of differing diameters enable steamed and non-steamed liquids to pour out separately. Even when not carefully poured, liquid drizzles out to ensure you can brew delicious coffee, even from the wide spout of a standard or electric kettle. Fits inside paper filters for use with any size 02 dripper.

Dripper / AS resin Paper  
Filter White 40 sheets

Easy and delicious even for first timers.

"Pegasus Dropper" supports the first step of hand dripping. A trapezoidal coffee dropper with two small holes and spiral ribs, aimed at hand drip beginners.

## PEGASUS DRIPPER

A guide scale that allows you to measure coffee powder.

A peephole allows you to see the amount of extraction.

The bottom shape allows for direct dripping from a thermal bottle.

Spiral ribs make it easy for coffee powder to expand, and two small holes make it easy to improve flavor reproduction.

## PEGASUS SERVER

Easy-to-remove lid knob.

Flip the lid over and use it as a simple drip tray.

Handle design allows you to hold it in a variety of ways.

Large, easy-to-grip handle.

Practical capacity 1800mL

Material: Glass pot / Heatproof glass  
Lid, Lid cap, Spout, Handle  
/ Polypropylene  
Sealant / Silicone rubber  
Band / Stainless steel

## Cool with ice while brewing. Rapid cooling iced coffee maker.

A long ice strainer rapidly cools the dripped coffee, so that iced coffee can be enjoyed immediately.  
The cone shaped dripper forms a deep coffee ground layer, and thoroughly extracts the flavor of the coffee.

put ice in the ice strainer

compact storage

For hot drink

### V60 Ice-coffee Maker VIC-02B

C/T18 142138  
W180 x D120 x H220mm  $\Phi$ 116mm  
Practical capacity 700mL

Iced coffee 2 ~ 4 cups  
Includes 40 sheets of VCF-02M

Material: Glass pot / Heatproof glass  
Dripper, Water Distributor, Ice Chamber,  
Handle, Lid / Polypropylene

# CERAMIC COATING

## Ceramic coating series that maintains the delicious taste of freshly brewed coffee.

The inside of the mug and pot is coated with ceramic. You can enjoy the delicious taste of freshly brewed coffee for a long time because it does not have the characteristic metallic odor that is characteristic of stainless steel. It doesn't get dirty easily and is easy to clean. The main body is made of stainless steel and has a vacuum insulated structure that maintains a delicious temperature.

With ceramic coating, you can enjoy the deliciousness of freshly brewed coffee for a longer period of time.

Vacuum insulation structure allows you to maintain a delicious temperature for a long time by keeping it hot or cold. It also prevents condensation from forming.

Comes with a convenient scale that lets you know how much to brew.

The ceramic coating gives it a pottery-like texture.

Ceramic coating white  
vacuum double thermal mug

## V60 Drip Scale

A scale with a timer for hand dripping.

This scale measures both volume and pour time, the two factors that are essential for a delicious cup of pour over coffee. New settings make the screen easier to read and eliminate regional discrepancies in measurement.

### V60 Drip Scale VSTN-2000B

C/T20 021907  
W120 x D190 x H29mm  
Weighing range 2~2000g  
Measurement time 99min 59sec  
Material: Body/ABS resin  
Anti-slip/ silicone rubber  
2 AAA batteries

iF DESIGN AWARD 2013 WINNER

It is thin and can be stored compactly.

Extraction amount and extraction time can be measured at the same time

## A drip tray is now offered for resting a dripper after brewing coffee

This porcelain drip tray is for V60 drippers in 01 and 02 size. After brewing coffee, move the dripper here straight from the server. The tray is also convenient for used tea bags.

### V60 Drip Tray DT-1W

C/T36 723962  
W115 x D115 x H42mm  $\Phi$ 115mm  
Practical capacity 120mL  
Material: Porcelain

## We aimed for an easy to use paper filter holder.

The slope at the bottom makes it easy to take out the paper filter. Small contact surface between the paper filter and the stand keeps it sanitary. 100 sheets of paper filter can be stored in this holder.

Very little surface contact keeps it clean.

The body is sloped on the bottom, making it easy to take out individual filters.

### V60 Paper Stand VPS-100W

C/T24 723924  
W165 x D68 x H100mm  
V60 paper filter  
01/02 100 sheets storage  
Material: Porcelain

Ideas for an easy-to-pour kettle are realized in the spout shape and the wooden handle that fits comfortably in one hand.

The spout is shaped for easy pouring and precise control. Additionally, the wooden handle and lid knob create a warm, inviting atmosphere.

You can also wrap your thumb around the top of the handle for a firmer grip.

The shape of the handle is designed for easy dripping. You can place your thumb on the top of it.

Compatible with open flames and induction heating.

Compatible with open flames and induction heating

V60 Drip Kettle Fit

Washer, Shaft cover, Inner burr holder, Grind adjustment knob  
/ Nylon  
Band / Silicone rubber  
Burr / Ceramic

# Coffee Mill

An important step in brewing coffee.

Ceramic mills are less likely to generate frictional heat, preventing damage to coffee powder caused by heat. Coffee mills come in a wide variety of sizes and materials, making them an important item for brewing delicious coffee.

Ceramic Coffee Mill Mini-Slim +  
**MSS-1TB**

V60 Measuring Spoon/Copper  
**M-12CP**

C/T48 716230  
W96 x D53 x H35mm  
Ground coffee 12g  
Material: Copper

Medium grind coffee grounds

Let the coffee grounds expand.

Cloth filter : Cotton flannel

● After using the filter cloth, please rinse thoroughly. Place the filter in a container with clean water and store it inside the refrigerator.

\* This is to prevent oxidation of the oil of the remaining coffee grounds on the cloth filter.

\* The cloth filter can be replaced.

## Nel Drip

Authentic flannel drip coffee.

Due to the slow extraction of coffee through the fine and delicate cotton flannel, it never compromises on the acidity, bitterness, and flavor from the bean's original characteristics.

Furthermore, you will be able to feel the coffee rich taste from the coffee oils, which is an advantage to this method.

For hot drink

### Drip Pot Wood Neck DPW-1

C/T12 331723  
W95 x D95 x H168mm Φ93mm  
Practical capacity 240mL 1-2cups

## Just shake it, and make foamed milk

A manual shaker milk frother. Fill the cup to the measurement mark with cold milk. Set up the filter and the upper and lower cups and shake well for about 20-30 seconds. This will make smooth, foamed milk for cappuccinos and lattes. By transferring the foam milk inside a microwave safe container and heating it up, you can enjoy it with hot drinks as well.

Pour cold milk up to the measurement marking.

Shake well for about 20-30 seconds.

Top off your favorite drink.

### Latte Shaker Off White LS-70-OW

C/T24 402768  
W72 x H173mm Φ68mm  
Practical capacity - milk 70ml  
(This can make foamed milk for 2 cups of cappuccino.)  
Material: Filter packing / Silicone rubber  
Filter frame / Polypropylene  
Cup / AS resin  
Mesh / Polyester resin

GOOD DESIGN AWARD 2013 WINNER

## Fluffed up milk in a blink of an eye

Microwave milk until it is 40-60°C. Use the following guidelines-500W approximately 50-60 seconds, 600W approximately 40-50 seconds. Tilt slightly and press the button, foaming the milk for 30-40 seconds. This will make smooth foamed milk for cappuccinos and lattes.

Milk measurement marking visible from the inside.

The lid can be used as an equipment holder.

Can be poured directly into a cup.

### Creamer "Z" CZ-1BR

2 AA batteries (not included)

## A coffee syphon with outstanding presentation

While enjoying a rich aroma, you can also visually enjoy the coffee moving up and down through the glass bowl. If the extraction times are the same, there is little difference in flavor, making this apparatus a favorite amongst professionals.

## Filter-in Coffee Bottle

### Cold Brewed Coffee

#### Wine bottle shaped cold brew coffee bottle

Just by adding coffee grounds and water, you can make iced coffee. Put coffee grounds in the strainer, and place the lid. Set the spout and pour small amounts of water inside. Once the water is poured, put the stopper and gently shake the bottle to start the extraction. Refrigerate for approximately 8 hours for the cold-brew to complete.

The strainer can be removed. The upper parts are designed to put a lid on the bottom strainer.

Align the strainer with the spout.

Pour directly.

For hot drink

# KA-KU Coffee Bottle

## Square shaped cold brew coffee bottle.

The bottle shape allows you to easily store your beverages sideways without spilling anything, and with the large size you can make more of your favourite cold brew in one go. Easy to clean thanks to the removable parts. Once the water is poured, put the stopper and gently shake the bottle to start the extraction. Refrigerate for approximately 8 hours for the cold-brew to complete. Ka-ku Filter-in Coffee Bottle with a square body ideal for horizontal storage.

### Ka-Ku Coffee Bottle KAC-110-PGR

C/T24 730199  
W90 x D90 x H320mm Φ85mm  
Finished Capacity 1,000mL 8 cups

Material: Body/PCT resin  
Removable bottle top,  
Strainer/Polypropylene  
Filter, Mesh/Polyester  
Packing /Silicone rubber

## You can prepare delicious cold brew coffee easily.

You can make iced coffee with just coffee and water.  
Pour small amounts of water to wet the coffee grounds while dripping with a circular motion.  
Once filled, place the cap and gently shake the bottle to start the extraction.  
Refrigerate for approximately 8 hours before serving.

\* The photograph is an image. When using, coffee powder will be placed in the strainer.

For hot drink

### Cold-Brew Coffee Pot 7 / Black MCPN-7-B

C/T24 143371  
W138 x D94 x H208mm Φ88mm  
Finished Capacity 600mL 5cups  
Material: Lid, Strainer frame, Handle band / Polypropylene  
Strainer mesh / Polyester resin  
Bushing / Silicone rubber  
Glass pot / Heatproof glass

### Cold-Brew Coffee Pot 14/ Black MCPN-14-B

C/T24 143388  
W138 x D94 x H294mm Φ88mm  
Finished Capacity 1,000mL 8cups

Pour water to the line.

Easy to hold handle.

The tea strainer's bottom portion can be taken off for easy cleaning.

## Water Dripper Drop

Make delicious iced coffee using the natural dripping of water.

Simply put in coffee grounds and pour water into the upper bowl for fresh coffee in 45 min to 1 hour.

The slim design is ideal for storing in the refrigerator.

Add coffee powder

Refrigerator storage

Pour directly.

### Water Dripper Drop WDDR-5-PGR

C/T12 730618

W107 x D102 x H304mm  $\Phi$ 96mm

Finished Capacity 600mL 5cups

Includes 50 sheets of paper

Material: Lid, Upper bowl / Acrylonitrile-Styrene resin  
Packing, Inner Holder, Strainer holder  
/ Silicone rubber  
Drip part, Strainer / Polypropylene  
Lower bowl/ Heatproof glass

## This drip-style cold brewed coffee device does not require speed adjustment

When water is put into the upper bowl, it flows and drips from the two slits of the dripper. The water drips completely in 1 hours without speed adjustment, enabling the casual enjoyment of authentic cold brewed coffee.

For hot drink

The dripping structure does not require adjustment.

A beaker-shaped pot.

### Slow Drip Brewer HARIO SHIZUKU SBS-5B

C/T12 163263

W116 x D116 x H360mm  $\Phi$ 73mm

Finished Capacity 600mL 5cups

Includes 50 sheets of paper

Material: Upper bowl, Pot / Heatproof glass  
Lid, Outer holder, Inner holder / Silicone rubber  
Strainer / Stainless steel  
Drip part / Polypropylene  
Paper filter / Paper

## Every drop creates the finest coffee

The slow dripping thoroughly extracts the flavor of the coffee, with a design that easily compliments a modern interior. The coffeestrength can be changed by adjusting the faucet.

Moisten the coffee grounds before extracting.

For hot drink

Use the faucet to adjust dripping rate.

### Water Dripper · Clear WDCR-6

C/T6 730601  
W150 x D129 x H455mm Φ77mm  
Finished Capacity 780mL 2~6cups  
V60 measuring spoon with 50 paper sheets  
Material: Glass lid, Upper bowl, Lower bowl, Pot / Heatproof glass  
The sealant attached to the glass lid, Joint of faucet, Cleat / Silicone rubber  
Faucet, Metal filter / Stainless steel  
Stand / Methacrylate resin  
Measuring spoon / Polypropylene

## Special coffee starts with the first drip

The water drips for 5 hours, extracting 2000ml of coffee into two flasks. The dripping rate during extraction can be adjusted using the faucet located on both sides.

For hot drink

### Water Dripper Wood 2 L WDW-20

C/T1 163232  
W290 x D230 x H980mm Φ105mm (upper)  
Practical capacity 2,000mL 20 cups  
Includes 50 sheets of paper  
Material: Upper bowl, Lid of lower bowl, Lower bowl, Pot, Glass tube / Heatproof glass  
Faucet tube, Faucet of pot, Metal filter, Faucet, Lid / Stainless steel  
Joint of faucet, Joint of Glass tube / Silicone rubber  
Wooden stand / Natural wood  
Paper filter / Paper
